- [Portfolio link ↗](#)

PROJECTS

Developed YouTube-Inspired Platform ↗

Dec 2024 - Jan 2025

- Built a YouTube clone using the MERN stack with a responsive UI.
- Implemented user authentication with JWT for secure registration and login.
- Built user interaction features like likes, comments, and shares to enhance engagement.

Developed ShoppYGlobe Front-End Application ↗

Dec 2024

- Designed and developed a responsive front-end e-commerce web application using React.js for a seamless user experience.
- Implemented an advanced search bar functionality to enable accurate product searches by name and brand, enhancing user experience.
- Implemented state management with Redux for a seamless UI experience.

Built a To Do Application ↗

Oct 2024

- Built a responsive and functional To-Do app using HTML, CSS, Tailwind CSS, and React.js.
- Enabled dynamic task addition, updating, and deletion.
- Implemented a tick mark feature to visually indicate completed tasks, enhancing user clarity.

SKILLS

- | | | |
|-------------------|--------------|---------------------------|
| • HTML | • CSS | • Tailwind CSS |
| • GitHub | • JavaScript | • Node.js |
| • Express.js | • MongoDB | • Effective Communication |
| • Time Management | • Bootstrap | • Figma |
| • React | | |

Developed APIs with Node.js and Express.js for ShoppYGlobe ↗

Dec 2024

- Extended the ShoppYGlobe e-commerce platform by developing a robust backend.
- Built the backend using Node.js and Express.js for handling data storage, user authentication, and API endpoints.
- Developed a streamlined shopping cart management system to enhance customer experience and meet their needs efficiently.

Built ShelfMaster- Online Library System ↗

Nov 2024 - Dec 2024

- Built book management application for browsing, searching, and adding books.
- Utilized React.js, Redux, and Tailwind CSS for seamless UI and state management.
- Integrated React Router DOM for smooth and efficient navigation.

Developed Weather Forecast App ↗

Jun 2024

- Built a responsive and user-friendly Weather Forecast app using HTML, CSS, JavaScript, and Tailwind CSS for real-time weather updates.
- Integrated OpenWeatherMap API to fetch real-time weather data.
- Implemented a search feature to fetch weather conditions by city name for quick and accurate forecasts.
